Subject: Michigan Plaza Site - Indianapolis; Response to IDEM June 22, 2011 Letter

Dear Carmen:

Mundell & Associates will be hand-delivering today, on behalf of AMMH, the response to IDEM's letter, '*Request for Revised Remediation Work Plan Approval Review and Technical Response to General Notice of Potential Liability Review*' dated June 22, 2011 for the **Michigan Plaza Site at 3801-3823 West Michigan Street in Indianapolis**. It will include an *Additional Investigation Activities Summary Report* that documents the investigation work requested by IDEM that was completed during the 2nd half of 2011. As you will learn from review of the document, it contains substantial new subsurface geologic and hydrogeologic information that will clarify the likely source of impacts to the deep groundwaters in the area, especially west of Holt Road .

Legal counsel for AMMH is forwarding today a digital copy of this package to the the U.S. EPA Region V for their review. As of the date of this response, we have not formally received the results of the U.S. EPA's study completed in the area near the end of 2011.

As soon as IDEM is able to review the package, we would like to meet to discuss the results of the investigation as it relates to the ongoing remedial activities at the site.

We look forward to meeting with you after your review.

Sincerely, John

John A. Mundell, P.E., L.P.G.
